Barry Cooper, FAA
Great Lakes Regional Admin.
2300 East Devon Ave.
Des Plaines, IL 60018

Dear Mr. Cooper,

I have been very concerned about the noise levels over the athletic fields at Maine South High School in Park Ridge, IL. I am writing in regards to a response letter you wrote to Citizen No. 13, July 9, 2010. For your quick reference, I am enclosing copies from pages I will be referencing. All were obtained from the FAA website.

Are you aware that the athletic fields, including the football stadium, are within the 65DNL? On page two of your letter to Citizen 13, you state "school athletic fields are, in fact, designated as school property, rather than public parks, when their primary function is to support school activities." According to the FAA's Land Use Guidelines, this is incompatible. Therefore, what noise mitigation efforts are being (or will be) made to reduce the noise levels at these fields?

From the noise contour maps, we know that the athletic fields are within the 65DNL. However, in the EIS Noise Analysis, the metrics stated show the DNL at Maine South to be 62.3DNL at build out. Since 65 is greater than 62.3, the only conclusion I can reach is that the individual noise events are louder over the fields. My question is, how much louder? What is Lmax *within* the 65DNL since the numbers reflected in the EIS correspond to the 62.3DNL? When evaluating noise over a noise sensitive area, is there a standard which requires using the greatest number?

With your expertise, I'm sure you are aware that since this runway is to be used primarily during daytime hours, the DNL is not an accurate reflection of the noise levels students are experiencing. Since there are multiple health risks to children in question, I request an immediate cease of the use of the flight track operating over the athletic fields until accurate numbers can be reflected in an updated EIS.

In a letter dated Sept. 6, 2005, Mr. Bharat Mathus, Deputy Regional Administrator, US EPA, stated "We will continue to work closely and collaboratively with FAA and the City of Chicago." Therefore, I am forwarding a copy of this correspondence to Ms. Kamke, US EPA.

I look forward to your prompt response to these concerns as I believe they relate to Environmental Justice since the health and well being of children is involved.

Sincerely,

cc: Sherry Kamke, US EPA
